I believe in satellite radio for several reasons, I bought my automobile with the satellite option available to me if I chose to use that option. I did and it was and has been wonderful for me I can get all the music that I like to hear and I can choose who not to listen to. I think you should not be able to tell me who to listen to and what kind of programming I should use. It all ends up being about money and taking it from the lower/ middle class workers. This is a question of consumer choice and the freedoms protected by the First Amendment. I Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. the weather and traffic stations come of great help to me and my family all year long.
